

## COMPANY PROFILE

Established 1993 | Bangladesh

# Complete industrial solutions and support

Plant and machinery supply, installation, commissioning and technical support for industry.

POWDER COATING / FAN PLANTS / BURNERS / CHEMICALS

## OUR COMPANY

# Built on industrial experience

Sadip Corporation is an industrial supply business serving Bangladesh. Established in 1993 as an importer of industrial lighting and fittings, the company shifted its focus to powder coating products in 1996.

Since that transition, we have helped introduce powder coating technology to the local industrial market. Our work combines the import and supply of machinery selected around customer requirements with installation, commissioning and technical support from engineers and technicians.

Our portfolio has expanded to include surface pre-treatment and foundry chemicals, industrial burners, a range of industrial machinery and complete fan plant machinery supply.

## 1993

Established as an importer of industrial lighting and fittings.

## 1996

Shifted focus to powder coating products and equipment.

## Our focus

Support customers in selecting, establishing and operating industrial production systems through appropriate equipment and practical technical assistance.

## WHAT WE SUPPLY

# Plants and machinery

## Powder coating plants and machinery

Supply of complete powder coating plants and machinery according to customer requirements, supported by installation, commissioning and technical assistance.

## Complete fan plant machinery

Machinery supply for fan manufacturing, including complete plant requirements and technical support for the fan industry.

Product photographs supplied by Sadip Corporation.

## OUR PRODUCT RANGE

# Equipment and chemicals

### Industrial burners

Import and supply of industrial burners for customer process requirements.

### Industrial machinery

Supply of industrial machinery, including power presses and production equipment.

### Surface pre-treatment chemicals

Chemicals for metal and aluminium surface preparation in industrial finishing processes.

### Foundry chemicals

Import and supply of foundry chemicals to support industrial casting operations.

Images illustrate product and application categories.

## HOW WE WORK

# Support beyond supply

## 01 Understand the requirement

Discuss the intended process, production needs and machinery requirements with the customer.

## 02 Arrange machinery supply

Source and import the required equipment according to the agreed customer requirements.

## 03 Install and commission

Provide installation and commissioning at the customer site.

## 04 Provide technical support

Assist customers with practical engineering and technical support for the supplied industrial systems.

## Discuss your next industrial requirement
